

Are you ready to revolutionise your ride?

The Sandyford Pedal Pulse Project is here to enhance your cycling journey.

Participants of this project will receive a smart bike light provided by Sandyford Business District and Dún Laoghaire-Rathdown County Council in conjunction with supplier See.Sense. This bike light is equipped with a sensor which will gather data on road surface conditions, travel routes and near-miss incidents.

By participating, you will contribute to safer roads, smarter infrastructure and a vibrant cycling community in Sandyford.

Enhancing cycling with data insights
